

Adigo Setup Guide

Frontend

- Upload `adigo-frontend.zip` to Hostinger's `public_html` via hPanel → File Manager
- Unzip inside `public_html`

Backend

- Clone your Replit backend repo
- Copy `.env.template` → rename to `.env`
- Add your API keys
- Click Run

Domain

- Connect your domain (adiai.in) to Hostinger
- Point to the frontend folder

You're live! 🎉
